79GHz MIMO-Type Ground Based Synthetic Aperture Radar (GB-SAR)

Remote Measurement and Visualization of Vibration and Small Displacement

Antenna Giken Co., Ltd.
AL19xx
79GHz GB-SAR System

Antennas for Satellites

Advanced antennas for satellites are used in the reception of Advanced Land Observing Satellite (ALOS-2). Parabolic types are mainly operated in designated time and position, and a flat type is required in the middle of the flight.
